SUMMARY

Final-year Computer Science student building **scalable full-stack and AI-driven systems**. Delivered **4+ production-grade projects**, including a cloud-deployed exam platform and AI-based screening system handling real user workflows. Solved **180+ DSA problems (100-day streak)**. Seeking a Software Engineer role to design, build, and scale high-impact systems.

SKILLS

Languages: C++, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: Bootstrap, Tailwind CSS, Responsive Design, React.js

Backend: Node.js, Express.js, RESTful APIs, JWT Auth

Databases: MongoDB, MySQL

Tools: n8n, Zapier, Git, GitHub, Docker

PROJECTS

Test Hub — Full-Stack Online Examination Platform | *MERN, JWT, Docker.*

Apr 2025 – Jun 2025

- Led a team of 3 to build a scalable MERN examination platform supporting 100+ concurrent users with JWT-based authentication.
- Decreased result processing time by **95% (hours → seconds)** through **real-time MCQ grading and code execution engine**.
- Containerized using Docker and deployed on Render, achieving **25% uptime** during testing.

Career Path Assistance System and DSA visualizer | *MERN, Python, ML, Docker, Groq LLM*

Jan 2026 – Mar 2026

- Coordinated a team of 3 to architect an ML-powered career guidance platform that analyses user skills and interests to recommend personalized career trajectories
- Trained a **TF-IDF** recommendation model on 1M+ records, achieving 95% prediction accuracy.
- Designed a responsive HTML/CSS interface to visualize personalized career roadmaps for students.
- Delivered an interactive DSA sandbox in React for real-time data structure visualization.

AI Resume Classifier & Screening Pipeline | *n8n, Groq LLM, Gmail API, Google Sheets*

Jan 2026 – Feb 2026

- Developed a resume screening system processing **50+ resumes per cycle**, eliminating manual effort.
- Classified candidates into **Fit / Maybe / Reject with ~85% accuracy** using role-specific prompt engineering.
- Generated instant email reports, reducing recruiter response time by **80%**.

LinkedIn Job Scraper & AI Scoring Pipeline | *n8n, Apify, Groq API, Google Sheets.*

Mar 2026 – Apr 2026

- Built a job discovery pipeline processing **500+ listings/day** (scraping → deduplication → LLM scoring → dashboard) to identify high-relevance roles.
- Lowered job search time by **90% (1+ hr/day → <5 mins/day)** using AI-driven ranking and filtering.
- Accomplished **100% duplicate removal accuracy**, ensuring clean and reliable datasets.

ACHIEVEMENTS

- LeetCode — 180+ problems solved · 100-day streak badge · SQL badge (50+ queries)
- HackerRank — C++ (5★), Python (3★), SQL (2★)
- Certifications — CSS Basics, Web & System Design HLD (Coder Army)

EDUCATION

B.Tech., Computer Science and Engineering (CSE) — Joginpally B.R. Engineering College, Hyderabad

Expected June 2026 · CGPA: 7.78
